Agilent Technologies

Agilent Technologies Statement on Global Harmonized System (GHS) Compliance

Agilent Technologies is committed to protecting health and the environment by ensuring the safety of its products throughout their lifecycles. As part of that commitment, Safety Data Sheets (SDS) are provided for hazardous chemical-biological products.

Agilent Technologies is on track to comply with all Global Harmonized System (GHS) regulations for chemical labeling in order to meet implementation timelines in each country. This change will not affect product composition or quality in any way. As of May 2015, you will begin to see updated labeling in shipments you receive from Agilent Technologies. Over the next several months, these updates will be complete across all of the required product lines.

During this transition you can find country specific GHS compliant SDS online at http://www.chem.agilent.com/en-US/search/library/Pages/MSDSSearch.aspx for complete information on all potential hazards.

If you cannot find a SDS you are looking for, or have any questions about product labeling, please contact us at contact_us@agilent.com or +1 877-424-4536 so we can assist you.
